is a web-based application that enables you to remotely monitor your vehicles from any computer with an internet connection.

Ctrack BX 500 Solution

This ultra-compact GPS tracking device, which is wireless and rechargeable, is designed to track high value parcels, cargo, and other valuable assets where the battery life is managed by the frequency of updates and performance settings.

Take control with reputable rechargeable batteries

Monitor valuable cargo to avoid theft by setting your own updates rates

Packed into a compact housing made of ABS/Polycarbonate plastic.

Accelerometer and GPS data used intelligently to detect movement and send live updates.

Batteries could last up to 4 years with 1 daily update.

Be in control to every aspect of your business by knowing where your assets are.
