

Government, Local Authorities & Public Services

The Ctrack Local Authority/Municipality monitoring and tracking system allows local authorities to scrutinise, assess and act on information in real time to limit theft and abuse of equipment and maximise the safety and productivity of employees.

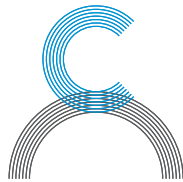

From verifying route completion or bin status on refuse vehicles, site conditions and obstructions affecting gully cleaners or the operating functions on road sweeping vehicles, Ctrack gives you a complete picture of vehicle and employee operations and the ability to reduce costs while greatly improving results.

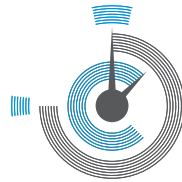

Ctrack Key Focus Areas

Vehicle & Fleet Tracking

Always Visible

Real-Time Visibility Software

Applications

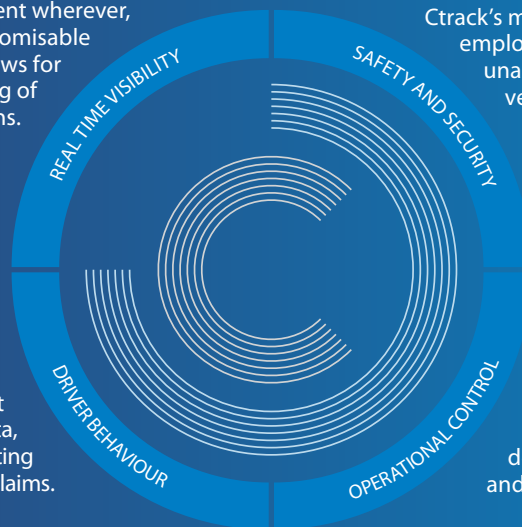

- Mobile Application – Ctrack Mobi
- Web based Vehicle Tracking – Ctrack Online
- Fleet Monitoring Software– Ctrack MaXx
- Ctrack Fleet Analytics

Benefits of Using Ctrack

Ctrack Mobi, Ctrack Online and Ctrack MaXx provide in-depth operational information and management wherever, and whenever, you need it. While customisable software and 3rd party interface allows for full adaptability and the streamlining of processes across different divisions.

Driver safety is supported through speed and RPM monitoring. The unauthorised use of vehicles is prevented with the use of Driver I.D. Ctrack also streamlines accident management and reporting by providing historical data, assisting in incident investigations and protecting authorities against fraudulent claims.

Ctrack's monitoring and tracking system ensures that employees' safety is maximised, and alerts for unauthorised or out of area use or collisions mean vehicles' safety is too.

Ctrack allows local authorities and municipalities total operational control of their fleets, providing detailed, accurate records for billing and maintenance records.
